New endoscopes and add-on devices to improve colonoscopy performance

Paraskevas Gkolfakis, Georgios Tziatzios, George D Dimitriadis,  
Konstantinos Triantafyllou

### Abstract

Colonoscopy is the gold standard for colorectal cancer prevention; however, it is still an imperfect modality. Precancerous lesions can be lost during screening examinations, thus increasing the risk of interval cancer. A variety of factors either patient-, or endoscopist dependent or even the procedure itself may contribute to loss of lesions. Sophisticated modalities including
