Surgical treatment of a rare complication after endoscopic stent placement for
anastomotic leakage after esophageal resection

Marjan Klinkert, Mechteld C de Jong, Meindert N Sosef, Annick B van Nunen,
Henricus J Belgers

Abstract

The best approach to achieve cure in esophageal cancer is a combination of chemo-
radiation and surgery. However, complications occur in half of patients. The current
report, reports a rare but severe complication: complete obstruction of the esophagus,
induced by preoperative chemo-radiation therapy. Normally, strictures are treated
