

Acute renal injury after partial hepatectomy

LAB Peres, LC Bredt, RFF Cipriani - *World Journal of Hepatology*, 2016 - [ncbi.nlm.nih.gov](https://pubmed.ncbi.nlm.nih.gov/)

Abstract Currently, partial hepatectomy is the treatment of choice for a wide variety of liver and biliary conditions. Among the possible complications of partial hepatectomy, acute kidney injury (AKI) should be considered as an important cause of increased morbidity and postoperative mortality. Difficulties in the data analysis related to postoperative AKI after liver resections are mainly due to the multiplicity of factors to be considered in the surgical ...
