COMMENTS TO AUTHORS

Review comments for ESPS (WJH) Manuscript 33799: I enjoyed reading the manuscript "Imaging guided percutaneous interventions in hepatic dome lesions: Tips and Tricks" by Kambadakone et al. This manuscript reviews the certain specific maneuvers and techniques that can enhance the success and safety of interventions in the hepatic dome. Work is written correctly. The remaining description, discussion on the topic is clear and correct. This review is really useful for readers of the Journal. And I think this manuscript should be priority published in WJH. Minor comments: 1) References marked (including in text and Refs) need to refer to the journal format.
