## Pancreatitis: Preventing catastrophic haemorrhage

Evans RPT *et al.* Haemorrhage in pancreatitis

Richard PT Evans, Moustafa Mabrouk Mourad, Gunraj Pall, Simon G Fisher, Simon R Bramhall

### Abstract

Pancreatitis represents nearly 3% of acute admissions to general surgery in UK hospitals and has a mortality of around 1%-7% which increases to around 10%-18% in patients with severe pancreatitis. Patients at greatest risk were those identified to have infected pancreatic necrosis and/or organ failure. This review seeks to highlight the potential vascular complications associated with pancreatitis that despite being relatively uncommon are associated with mortality in the region of 34-

### Match Overview

- | Match Number | Crossref | Words    | Matched Text   | Similarity |
|--------------|----------|----------|--|------------|
| 1            | Crossref | 32 words | Pezzilli, Raffaele, Alessandro Zerbi, Donata Campra, Gabriele Capurso, Rita Golfieri, Paolo G. Arcidiacono, Paola Billi, | 1%         |
| 2            | Crossref | 23 words | Tulsyan, N. "The endovascular management of visceral artery aneurysms and pseudoaneurysms", Journal of Vascu             | 1%         |
| 3            | Crossref | 16 words | Richard M. Mendelson. "Vascular complications of pancreatitis", ANZ Journal of Surgery, 12/2005                          | <1%        |
| 4            | Crossref | 12 words | Lankisch, Paul Georg, Minoti Apte, and Peter A Banks. "Acute pancreatitis", The Lancet, 2015.                            | <1%        |
