2014年12月4日 - High presence of antibiotic-resistant strains of H. pylori suggest that milk and dairy samples may be the sources of bacteria that can cause severe infection. Our findings should raise awareness about antibiotic resistance in H. pylori strains in Iran. Keywords: Helicobacter pylori, Virulence factors, Antibiotic ...

Can bacterial virulence factors predict antibiotic resistant H. pylori ...

<https://www.isge.ie/abstracts/view/202/> ▼ 翻译此页

Infection with cagA- H. pylori may predict clarithromycin resistance. This may be because cagA+ bacteria replicate at a higher rate and are therefore more susceptible to clarithromycin, so will be eradicated faster. Further study is planned to investigate the clinical relevance of virulence factors in H. pylori infection.
