Microbial markers in colorectal cancer detection and/or prognosis

Villéger R *et al.* Microbial markers for colon cancer screening

Romain Villéger, Amélie Lopès, Julie Veziat, Johan Gagnière, Nicolas Barnich, Elisabeth Billard, Delphine Boucher, Mathilde Bonnet

Abstract

Colorectal cancer (CRC) is the second leading cause of cancer worldwide. CRC is still associated with a poor prognosis among patients with advanced disease. On the contrary, due to its slow progression from detectable precancerous lesions, the prognosis for patients with early stages of CRC is encouraging. While most robust methods are invasive and costly, actual patient-friendly screening methods for CRC
