Helicobacter pylori: A foodborne pathogen?

Quaglia NC *et al.* *H. pylori* in foods and water

Nicoletta C Quaglia, Angela Dambrosio

Abstract

Helicobacter pylori (*H. pylori*) is an organism that is widespread in the human population and is sometimes responsible for some of the most common chronic clinical disorders of the upper gastrointestinal tract in humans, such as chronic-active gastritis, duodenal and gastric ulcer disease, low-grade B-cell mucosa associated lymphoid tissue lymphoma of the stomach (MALToma), and gastric adenocarcinoma, which is the third leading cause of cancer death worldwide. The routes of infection have not yet been
