SPECIFIC COMMENTS TO AUTHORS

This is a comprehensive review regarding current knowledge of mi-RNAs associated with clinical aspects of CRC. The article was very well-written, but the field of mi-RNAs in association with clinical settings is still immature and therefore, the review would not

SPECIFIC COMMENTS TO AUTHORS

Despite the fact, that the article is a review, on my opinion it must be shortened.
Otherwise it provides thorough and up-to-date information about the topic.

SPECIFIC COMMENTS TO AUTHORS

Title: MicroRNAs in the prognosis and therapy of colorectal cancer: from bench to bedside. The authors indicated the current knowledge of miRNAs and their potential for therapeutic applications in the future. Recently, several reviews about miRNAs have

been published. The some points of view in this review are different from the past reviews. This manuscript is very interesting. However, I feel there are some problems in this article.
