SPECIFIC COMMENTS TO AUTHORS

The authors undertook a review concerning ablative treatment of oligometastasis in prostate cancer. They abstracted the main results published in the literature about the use of SBRT in regard of the optimum schemes, response assessment, and the identification and diagnosis of oligometastatic patients. They should be congratulated for this high quality review. The manuscript is well-written with adequate reference to the current medical literature in the field. The content of the text is satisfactory enough and the tables and figures are informative. The review can be published for educational purposes especially for clinicians in the field.

Thank you very much for your comments. We are satisfied with your words concerning our manuscript.

We have included the audio core tip.

Kind regards,
