SPECIFIC COMMENTS TO AUTHORS

This review article is a very well written. However, it is still difficult to diagnose PSC with only MRI. It is necessary to search biomarkers with high diagnostic ability.

SPECIFIC COMMENTS TO AUTHORS

Excellent review. For the general readers, it is better to elaborate the abbreviations: TIMP-1, PIIINP, FIB-4 and APRI in the section of serum markers of fibrosis.

SPECIFIC COMMENTS TO AUTHORS

The manuscript is regarding to MRCP in the diagnosis of PSC. Development of computer aid diagnosis MRCP has a role in the diagnosis biliary diseases in the future. With the aid of special contrast, MRCP can provide more details in diagnosis. It could be better than ERCP. However ERCP can get cytologic and histologic specimens for

<https://www.wjgnet.com>

pathologic study. ERCP with cholangioscopy can provide direct visualization of biliary tree. It also can get specimens for pathologic study too. All image studies, include CT, MRCP, angiography, ERCP and Sonography cannot replace pathology diagnosis completely. This review demonstrated the role of MRCP in diagnosis of PSC. It is good and complete. Suggest accept.
