Nipha Chaicharoenaudomrung and the other authors made a review on three-dimensional (3D) culture systems and its possible applications. The review is comprehensive and has good illustrations. My suggestions are that the authors should ask an expert in English editing. Besides grammatical problems, make it concise.

SPECIFIC COMMENTS TO AUTHORS

The manuscript is well written and contains a lot of valuable information regarding 3D cultures. I consider it for being published in this journal upon authors deal with the following small changes. 1. In my oppinion the initial part is redundant, and I am affraid that not many interesting information is provided. After line 152, the authors focus on the real topic of the manuscript; therefore, the manuscript gains on interest; so, Could authors summarize the information contained in the manuscript until that point?). The fact that they perform a comparation between 2D and 3D culture types is in my oppinion the most interesting point in their manuscript. In addition, they present al lot of examples where 3D culture has been actually applied, which may help to other scientifics to take the decision to move into this new methodology. 2. Author should carefully revised the manuscript looking for typo mistake. For instance, cite number [1] in the text should be superscript. Many times authors introduce an space before the full stop, instead of after full stop.
