## The evolving spectrum of diabetic nephropathy

Kopel J *et al.* The evolving spectrum of DN

Jonathan Kopel, Camilo Pena-Hernandez, Kenneth Nugent

### Abstract

Diabetes remains an important health issue as more patients with chronic and uncontrolled diabetes develop diabetic nephropathy (DN), which classically presents with proteinuria followed by a progressive decrease in renal function. However, an

OVERVIEW

SYMPTOMS

RISK FACTORS

COMPLICATIONS

Diabetic nephropathy is a serious kidney-related complication of type 1 diabetes and type 2 diabetes. It is also called diabetic kidney disease. Up to 40 percent of people with diabetes eventually develop kidney disease. Diabetic nephropathy affects the ability of your kidneys to do their usual work of removing waste products and extra fluid from your body. The best way to prevent or delay diabetic nephropathy is by maintaining a healthy lifestyle and treating your diabetes and high blood pres...

### Diabetic Nephropathy: Diagnosis, Prevention, and Treatment ...

[care.diabetesjournals.org/content/28/1/164](https://care.diabetesjournals.org/content/28/1/164) ▾

Jan 01, 2005 - Diabetic nephropathy is the leading cause of kidney disease in patients starting renal replacement therapy and affects ~40% of type 1 and type 2 diabetic patients. It increases the risk of death, mainly from cardiovascular causes, and is defined by increased urinary albumin excretion (UAE) in the absence of other renal diseases.
