SPECIFIC COMMENTS TO AUTHORS

Dear Authors Thank you for your good presentation In my opinion, ERCP is a very important issue in patients who undergo Roux-en-Y HJ or Billroth-II gastrojejunostomy, and many centers in this regard unfortunately lack experience. This manuscript is a

guide for many centers. In our center, we have to perform percutaneous transhepatic biliary drainage procedures in many liver transplant patients because we cannot do ERCP in patients who had Roux-eY HJ. My comment about this manuscript as follows: The manuscript is not prepared in accordance with the WJG series. Please check the sample review article at <https://www.wjgnet.com/bpg/GerInfo/217>. The rankings of the references in the article were inaccurate. Please follow the order. The reference style is not suitable for the WJG series. Please correct your reference list in accordance with WJG series. You had to make the suggestions of your language editor before you submitted your article to the journal. To me, this situation shows that you don't give the necessary value to your article. I couldn't understand why you're writing the names of the authors in red color. Please write them in normal text color (black). I'm curious about the authors' own experiences. I wonder how the authors have achieved their success in these centers. The authors should share their experiences with a few sentences at the end of each sub-title.

SPECIFIC COMMENTS TO AUTHORS

ERCP in patients with surgically altered anatomy is demanding. The authors present a huge amount of data regarding reconstruction types, selection of optimal endoscopes, cannulation techniques, sphincterotomy and papillary dilation techniques. Additionally

they present data for EUS assisted or laparoscopic assisted techniques. Indeed, they have done a great work and they have covered all the aspects regarding ERCP in patients with altered anatomy. They provide useful information for everyone who is treating such patients.
