

Please give the “TA” abbreviation in full when first mentioned in the text.

➔ We add the tibialis anterior at the #119 of line number.

Ag/AgCl alloy dual electrodes (Noraxon Dual EMG Electrode, USA) were attached to tibialis anterior (TA)

Did the symptoms improve immediately after botulinum toxin injection?

➔ We added further explanation.

After botulinum toxin injection, his symptom improved after about 30 minutes

How long this improvement lasted? Overall follow-up of the patient?

➔ Unfortunately, the patient did not come to our clinic.

We recommended again a department of psychiatry to rule out for a psychiatric cause in the 3 months follow-up. He refused our suggestion and did not come to our clinic after that time.

There are several grammatical mistakes within the manuscript that need correction.

➔ We did double checked
