

PEER-REVIEW REPORT

Name of journal: World Journal of Clinical Cases

Manuscript NO: 52778

Title: Bibliometric analysis of subject trends and knowledge structures of Gut Microbiota

Reviewer's code: 02458901

Position: Peer Reviewer

Academic degree: FACC, MBBS, MD, PhD

Professional title: Emeritus Professor

Reviewer's Country/Territory: Czech Republic

Author's Country/Territory: China

Manuscript submission date: 2020-04-07

Reviewer chosen by: AI Technique

Reviewer accepted review: 2020-04-14 11:24

Reviewer performed review: 2020-04-26 01:29

Review time: 11 Days and 14 Hours

SPECIFIC COMMENTS TO AUTHORS

Gut microbiota is composed of thousands of different types of bacteria, of which more than 98% include four bacterial phyla: Firmicutes, Bacteroides, Proteobacteria and Actinobacteria. The microbiome plays a potential role in human health, including early in life and in some special diseases such as cardiac metabolic disorders, IBD, nervous/mental diseases, and cancer. With the recent development of bibliometrics the effects of gut microbiota in obesity and the research hotspots of gastrointestinal microbiota have been further studied. In this study, the trends in the research field of gut microbiota were revealed. The study is very interesting. Manuscript is very well written. Data collection is reasonable, and methods are clear. Results are listed in a good manner. Figure 2, 3, 4 and 6 should be updated, the words in those figures are too small, difficulty to read. References are updated, and reasonable referred. Some minor language editing is required.

SPECIFIC COMMENTS TO AUTHORS

Very interesting study of subject trends and knowledge structures of gut microbiota. The results of the study is interesting and useful. Please editing the manuscript according to the guideline of the journal, include the references list. Thank you.
