The authors have provided a detailed narrative review on unusual cases of thoracic hydatid disease. The manuscript is well-written and the cases well supported by relevant imaging findings. In the opinion of this reviewer the quality of the manuscript will be further enhanced if the authors include an information box providing an overview of hydatid disease including pathogenesis, pathology, diagnostic tests and management. This will not only compliment the review but also appeal to the general readership of the manuscript. Overall the authors must be congratulated for producing an interesting manuscript that will prove to be a useful addition to the existing literature on the subject.

Dear editor and authors, The authors provided a review on an interesting topic which is well presented. I think the topic is important, contributive, and quite valuable for clinical professionals, especially the figure plates provided. Minor English editing and typesetting are encouraged before publication.
