#### **SPECIFIC COMMENTS TO AUTHORS**

The authors investigated "Prognostic Importance of Lymph Node Yield after Curative Resection of GastroenteroPancreatic Neuroendocrine Tumours" They have found an increased risk of relapse in patients who had  $\geq 8$  LNs retrieved and a high LN yield and LN positivity in small intestinal NETs (SiNETs) and Pancreatic NETs (PanNETs). The manuscript is well-written with adequate references and deserves publication for educational purposes
