6	<p><i>Author names and affiliations</i></p> <p>Issues raised 1: Each author on the list must have an affiliation. Authors are requested to adjust the order of authors and affiliations. Authors who have the same affiliation should be listed together. When one author has several affiliations, please list each affiliation separately. The writing format is: name (in bold font), department, institution, city, zip code, province (state), country. Examples are as follows:</p> <p>Example 1: Yuki Aisu, Tomohide Hori, Department of Surgery, Kyoto University Graduate School of Medicine, Kyoto 606-8507, Japan</p> <p>Example 2: Zhen-Jiang Li, Bin Duan, Peng Du, Department of Kidney Disease, Dialysis Center, Shaanxi Provincial People’s Hospital, Xi’an 710068, Shaanxi Province, China</p> <p>Example 3: Katherine Roth, Jenna Strickland, Bryan L Copple, Department of Pharmacology and Toxicology, Institute for Integrative Toxicology, Michigan State University, East Lansing, MI 48824, United States</p>	[Y]
7	<p><i>Corresponding author</i></p> <p>Issues raised 1: Please change the corresponding author’s institution name and address. 	<p>address (including zip code) and e-mail (written in all lowercase). 8	<p>Citation</p> <p>Issues raised 1: Please add a citation that includes all authors, title, journal name, year, and In press. The order of authors' names should be consistent with the order of authorship, with the full last name placed in front of the abbreviated first name. Example is as follows:</p> <p>Citation: Troncone E, Fugazza A, Cappello A, Blanco GDV, Monteleone G, Repici A, Teoh AYB, Anderloni A. 10	<p>References</p> <p>Authors are responsible for the accuracy and completeness of their references and for correct text citation. Cite references in ascending numeric order upon first appearance in the manuscript file.</p> <p>Issues raised 1: The "reference numbering system" should be adopted, that is, the Arabic number of references is arranged in ascending order according to the order they appear in the text, and the reference number is indicated with square brackets in the upper right corner of the place where it is cited. Examples are as follows:</p> <p>Example 1: In "Other studies have reported lower hospital mortalities and intubation complication rates for helmet-based NIV than for oronasal mask-based NIV in cases of acute respiratory failure⁷⁻⁹ or (7-9)", 7-9 or (7-9) should be changed as [7-9] and formatted as superscript.</p> <p>Example 2: Length, diameter and radial expansive force after deployment^[1,18,22-25].</p> <p>Issues raised 2: There is a space after ", " in reference citation [1, 2]. Please delete all spaces after ", " and format ^[1,2] as superscript.</p> <p>Issues raised 3: It is incorrect that the reference number in reference citation [1,4,2] has not been numbered in ascending order. Please change [1,4,2] to ^[1,2,4] and format it as superscript.</p>	<p>[Y]</p> <p>In text and reference list citations updated and reformatted</p>

Issues raised 4: For in-text citations including authors' names, please use the first author's name followed by *et al* when there are more than two authors, e.g., Larssen *et al*^[28].

Issues raised 5: There is no need to use a hyphen between two consecutive references. Please change [1-2] to ^[1,2] and format it as superscript.

Issues raised 6: A hyphen is required when three or more references are cited in succession. Please change ^[1,2,3,4] to ^[1-4].

Issues raised 7: No space is allowed between the text word and the reference number. Please change world ^[1,2] to world^[1,2].

Issues raised 8: The in-text numbering of references is not in order, and there are omitted citations. Please verify that each in-text reference number is arranged in ascending order, and delete duplicate reference citations.

Issues raised 9: Please provide the PubMed numbers and DOI citation numbers to the reference list and list all authors of the references. Please revise throughout. The PMID is required, and NOT the PMCID; the PMID number can be found at <https://pubmed.ncbi.nlm.nih.gov>. (Please begin with PMID:) The DOI number can be found at <http://www.crossref.org/SimpleTextQuery/>. (Please begin with DOI: 10.**).

Issues raised 10: PMID and DOI numbers of references from English-language journals. Please add a space between the PMID and DOI numbers in the square brackets. Do not add [] to the numbering of references or add any symbol at the end of PMID and DOI numbers. For example: **Antoniou SA, Kohler G,**

	<p>Antoniou GA, Muysoms FE, Pointner R, Granderath FA. Meta-analysis of randomized trials comparing nonpenetrating vs mechanical mesh fixation in laparoscopic inguinal hernia repair. <i>Am J Surg</i> 2016; 211: 239-249 [PMID:26316363 DOI: 10.1016/j.amjsurg.2015.06.008]</p> <p>Issues raised 11: Please delete the references without PMID or DOI number except WHO guidelines and book references. When a reference must be cited, please provide the full web address. For example: Cannon R. Riloncept to improve artery function in patients with atherosclerosis. [accessed 2015 Apr 25]. In: ClinicalTrials.gov [Internet]. Bethesda (MD): U.S. National Library of Medicine. ClinicalTrials.gov Identifier: NCT00417417. Available from: http://clinicaltrials.gov/show/NCT00417417.</p> <p>Issues raised 12: PMID and DOI numbers of references from Chinese-language journals. Please add a space between the PMID and DOI numbers in the square brackets. The name of Chinese-language journals should be written in Chinese Pinyin according to each word, with the first letter of each word capitalized. For example: Zhang ZM, Deng H, Zhang C, Yu HW, Liu Z, Liu LM, Wan BJ, Zhu MW. Strategies for diagnosis and treatment of benign and malignant colorectal obstruction. <i>Shijie Huaren Xiaohua Zazhi</i> 2017; 25: 2597-2604 [DOI: 10.11569/wcjd.v25.i29.2597]</p>	
11	<p><i>Figures and Tables</i></p> <p><u>Please place figure legends, figures, tables, and table notes in separate pages at the end of the manuscript. Create vector graphics and images using Microsoft PowerPoint To create</u></p>	[Y]

vector graphics and images to ensure that all graphs or text portions can be reprocessed by the editor.

Issues raised 1: Please provide the decomposable figure of all the figures, whose parts are all movable and editable, organize them into a PowerPoint file, and submit as “Manuscript No. - image files.ppt” on the system. Make sure that the layers in the PPT file are fully editable. For figures, use distinct colors with comparable visibility and consider colorblind individuals by avoiding the use of red and green for contrast.

Please read these four important guidelines carefully and modify your figure(s) accordingly:

First, all submitted figures, including the text contained within the figures, must be editable. Please provide the text in your figure(s) in text boxes.

Second, for line drawings that were automatically generated with software, please provide the labels/values of the ordinate and abscissa in text boxes.

Third, please prepare and arrange the figures using PowerPoint to ensure that all graphs or text portions can be reprocessed by the editor.

Fourth, in consideration of color-blind readers, please avoid using red and green for contrast in vector graphics or images.

For pictures with multiple parts, please create text box in the upper left corner with uppercase letters A, B, etc. ; please use SmartArt, text box and shape to draw the flowchart directly in PowerPoint;

Issues raised 2: Please check the text format in the figures and tables. Capitalize the first letter of a sentence and lowercase the rest, except for special phrases.

	<p>Issues raised 3: Please verify the abbreviations used in figures and tables and define them (separated by semicolons) at the end of the figure legend or table. For example, BMI: Body mass index; CT: Computed tomography.</p>
