<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4663384>

Nov 27, 2015 · The “**watch and wait**” approach was first proposed by Dr. Angelita Habr-Gama in Brazil in 2009. Those patients with cCR are followed with close surveillance physical examinations, endoscopy, and imaging. Here, we review management of **rectal cancer**, the development of the “**watch and wait**” approach and its outcomes.

Abstract

According to the main international clinical guidelines, the recommended treatment for locally-advanced rectal cancer is neoadjuvant chemoradiotherapy followed by surgery. However, doubts have been raised
