SPECIFIC COMMENTS TO AUTHORS

Summary of the manuscript The authors well reviewed Ayurvedic Herbs-associated liver injury. The authors mentioned about several types of Ayurvedic Herbs. However, the description was too long and hard to understand. Major comments. 1. The authors should make a table for summarizing several types of Ayurvedic Herbs. They should show main causative agents contained in Ayurvedic Herbs, type of liver injury (e.g., cholestasis, hepatocellular necrosis, sinusoidal obstruction, etc.), authors and countries of the report, risk of mortality, etc. 2. Figures seem too many. They should limit the figures.

The authors revision can be almost satisfactory. However, the authors should make Table 1 smaller. For example, they should use abbreviations.
