

-Requeriments for figures:

All submitted figures and tables, including the text, are editable and they are inside the main manuscript file. Also, as a requeriment for the figures, I prepared the figures using Power Point (see the attached file).

-Point-to-point response to the issues raised in the peer-review reports:

Reviewer 2:

We have added 4 new images to improve the figures as indicated: Cholangiocarcinoma before surgery, relapse in S4 before first line chemotherapy treatment (FOLFOX), the response of disease in S4 after chemotherapy treatment (FOLFOX), peritoneal and pleural progression to FOLFOX (CT prior to nab-paclitaxel treatment) and also CT after 4 cycles of nab-paclitaxel treatment.

Reviewer 3:

We added the word "cancer" after pancreatic in the abstract as you indicated us.

-Response to Editorial Office's Comments:

1. Science Editor:

-We send the Copyright License Agreement handwrite signed by all the authors.

-We provide the original document where CA19-9 blood levels are registered and also screen captures of our software of both diarrhea and pleural effusion study.

All CT images are original.

2. Editorial Office Director:

-We send the Copyright License Agreement handwrite signed by all the authors.

3. Company Editor-in-Chief:

We appreciate your comments. We made the major revisions previously commented.
