## Novel mainstream capnometer system is safe and feasible ...

<https://bmjopengastro.bmj.com/content/6/1/e000266> ▼

Feb 01, 2019 · Background and aims There is a need to safely achieve conscious sedation during **endoscopic** retrograde cholangiopancreatography (ERCP). We evaluated the safety and feasibility of a mainstream capnometer system to monitor apnoea during ERCP under CO2 insufflation. Methods Non-intubated adult patients undergoing ERCP-related procedures with intravenous ...

## Papillectomy and Ampullectomy - ScienceDirect

<https://www.sciencedirect.com/science/article/pii/B9780323481090000250>

Overall **adverse events** based on some of the larger **endoscopic papillectomy** series average approximately 22% (range 10% to 58%) and can be classified as early (pancreatitis, bleeding, perforation, cholangitis) and late (papillary stenosis).36, 66, 98, 99 Procedure-related mortality is very low, averaging 0.03% (range 0% to 7%). The most commonly ...

## [A Novel Technique of Endoscopic Papillectomy with Hybrid ...](https://www.mdpi.com/2077-0383/9/8/2671)

<https://www.mdpi.com/2077-0383/9/8/2671> ▼

Background: **Endoscopic papillectomy** (EP) carries a potential risk of procedure-related **adverse events** and incomplete resection. Since hybrid **endoscopic** submucosal dissection (ESD) had been established as an alternative option for relatively large and difficult gastrointestinal tumors, we evaluated a **novel** EP with hybrid ESD (hybrid ESD-EP) for curative safe margin in this proof-of-concept study.
