SPECIFIC COMMENTS TO AUTHORS

This article analyzes the clinical manifestations and radiological findings of COVID-19 infection. Though we do not know about the pathophysiology and clinical course of COVID-19 infection, the presence of certain patterns on CT and PET-CT scans may facilitate diagnosis and help to select the appropriate treatment. We can further understand the characteristics of coronavirus. This is an article from the front line of preventing infectious diseases. In addition, the article is presented in a concise manner, provides novelty and could stimulate future projects for the journal's readers and I strongly support its publication.
