COVID-19 treatment: What are monoclonal antibodies and ...

<https://www.timesnownews.com/health/article/covid...> ▾

Aug 10, 2020 · Monoclonal antibodies are made in the lab to imitate the body's natural antibodies that help the body fight off pathogens - in this case, SARS-CoV-2. According to a report published in the journal JAMA, neutralising monoclonal antibodies to SARS-CoV-2 have the potential to both prevent and treat COVID-19 and can **help to guide vaccine design and development**.

Antibody Drugs Aim to Fill Covid-19 Treatment Gap
