SPECIFIC COMMENTS TO AUTHORS

Reviewer's report Manuscript ID: WJCO 57614 Title: Primary small cell esophageal carcinoma (SCOC): a retrospective study of different treatment modalities Date:2020/6/19 Reviewer's report: Review of Primary small cell esophageal (SCOC): a retrospective study of different treatment modalities This is an interesting manuscript as it is a retrospective analysis of different treatment modalities on this highly poor prognosis as well as a rare group of esophageal ca . Until now ,there was no general consensus of optimal treatment in this group of patients. Thou, there are some limitation in this study such as adverse event and a major factor affecting prognosis were not recorded. Nevertheless, this manuscript will add to growing body of literature on the benefit of CCRT in the treatment of limited stage small cell ca of esophagus. However, there are a few issues in the manuscript that need to be addressed prior to publication. 1. How many number of patient in each group , sequential chemotherapy group and concurrent chemotherapy radiotherapy group developed \geq grade III acute toxicity ? 2.What was the major factor affecting the overall survival ?
