**Abdominal aortic thrombosis as initial presentation of COVID-19 infection: A case report**

Webster WZ *et al.* COVID-19 Thrombosis

William Zachary Webster, Amrit Sraow, Karla Cruz Morel

**Abstract**

**BACKGROUND**

The hypercoagulable state associated with coronavirus disease 2019 (COVID-19) has been shown to complicate the course of this viral illness with both venous and arterial clots. Often presenting after hospitalization and known COVID-19 diagnosis, the etiology of thrombosis has been attributed to the hyperinflammatory state and endothelial dysfunction associated with COVID-19. This report portrays a patient who experienced an aortic thrombosis resulting in back and leg pain with subsequent loss of
