

Dear Editors,

Thank you very much for allowing us to revise our **Invited Manuscript NO: 58129** entitled **“Adipose-derived stem cells: pathophysiologic implications versus therapeutic potential in systemic sclerosis”** by Irene Rosa, Eloisa Romano, Bianca Saveria Fioretto, Marco Matucci-Cerinic and Mirko Manetti.

The manuscript has been revised according to the Reviewer's and the Editorial Office's comments and suggestions.

As reported in the first manuscript submission, we are confident about the quality of our scientific English writing and, as reported in the author contribution, Prof. Marco Matucci-Cerinic, who fluently speaks four languages including English and is Editor of several international journals, edited the paper. Moreover, the Reviewer classified the Language Quality of our manuscript as Grade A (Excellent/Priority publishing), which was confirmed by the Science Editor.

Thank you very much in advance.

With kind regards,

Mirko Manetti

Dr. Mirko Manetti, PhD, Assistant Professor,
Department of Experimental and Clinical Medicine,
Section of Anatomy and Histology,
University of Florence,
