Vancomycin-induced thrombocytopenia in endocarditis: A case report and review of literature

Guleng SR *et al.* Vancomycin-induced thrombocytopenia in endocarditis

Si-Ri Guleng, Ri-Han Wu, Xiao-Bin Guo

Abstract

BACKGROUND

Thrombocytopenia is a serious complication in the medical practice of numerous drugs. Vancomycin is frequently used for the prophylaxis and treatment of suspected or identified methicillin-resistant positive infections. Several cases with vancomycin-induced thrombocytopenia (VIT) have been reported. However, these have rarely been
