Padua University Hospital

Via Giustiniani 2, 35128 Padova (Italy).

**Reviewer #1:** *As the authors mentioned, this concise review contains very comprehensive description with extensive review of studies regarding epidemiology and therapeutic options and prophylaxis as well in the critically ill patients awaiting liver transplantation and after liver transplantation. This review article can be very informative to the readers to guide for caring critically ill patients with high risk of candida infection.*

We would like to thank the Reviewer for his valuable comments.

**Science Editor Comments.**

1. *The column should be minireviews*

The column has been changed, accordingly.

2. *The “Author Contributions” section is missing. Please provide the author contributions*

The Author Contribution section has been provided, accordingly.

3. *The authors did not provide original pictures. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor.*

Original pictures have been provided in a Power Point document, as requested.

4. *PMID and DOI numbers are missing in the reference list. Please provide the PubMed numbers and DOI citation numbers to the reference list and list all authors of the references. Please revise throughout.*

PMID and DOI numbers have been added, accordingly.

5. *The reference’s number should be put in the square bracket, then make it be superscript.*

The reference format has been revised throughout the manuscript, accordingly
