Repairing the heart with stem cells - Harvard Health

<https://www.health.harvard.edu/heart-health/repairing-the-heart-with-stem-cells>

Research RealitiesWhat Are The Risks?from Theory to Practice

These results sound dramatic, but are they an indication that we're getting close to perfecting this therapy? \"This is a field where, depending on which investigator you ask, you can get incredibly different answers,\" says Dr. Richard Lee, professor of medicine at Harvard Medical School and a leading expert on stem cell therapy. \"The field is young. Some studies show only modest or no improvement in heart function, but others have s...
