Reviewer comments

Summary of the Peer-Review Report: This is a well written review. Adding a few lines regarding peroxisome proliferator-activated receptors and their novel ligands as potential therapeutic targets, as well as improving the quality of the figures would make this review a better work

Response:

Answer: We would like to thank the reviewer for the insightful and constructive comment regarding our manuscript. We the authors are very grateful for his/her positive evaluation of our paper.

Thank you very much for your positive comments. We added a sentence as suggested on the role of peroxisome proliferator-activated receptors and their novel ligands as potential therapeutic targets.

Regarding Figures: Thank you for your advice. We understand that the visualization of the word doc is not good. However, we are uploading a high quality PPT files that has a very good quality. The legend of the figures are complex because we performed many systems biology approaches that are in nature very complex. We chose to provide the readers all details as they can understand the complex processes of the approaches and also to provide all necessary details for its understanding.
