**Olfactory dysfunction in antineutrophil cytoplasmic antibody-associated vasculitides: A review of the literature**

Alfonso Luca Pendolino, Anika Kaura, Annakan Navaratnam, Monica Pendolino, Gerolamo Bianchi, Samit Unadkat, Giancarlo Ottaviano, Premjit S Randhawa, Peter J Andrews

**Abstract**

Olfactory dysfunction (OD) has been described in patients with antineutrophil cytoplasmic antibody-associated vasculitides (AAV), but the underlying mechanisms are not completely understood. The causes of altered smell function can generally be divided into conductive, sensorineural or others. To date no

## ANCA-Associated Vasculitis in a Patient with Systematic ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4464031>

ANCA-associated glomerulonephritis rarely occurs in patients with systemic sclerosis (SSc) [3, 4] or Sjögren's syndrome (SS) [5, 6, 7]. Here we report a Japanese woman who developed ANCA-associated glomerulonephritis at the age of 8 years after the diagnosis of both SSc and SS.

## Management of ANCA associated vasculitis | The BMJ

<https://www.bmj.com/content/368/bmj.m421> ▾

Mar 18, 2020 · Anti-neutrophil cytoplasmic antibody (**ANCA**) associated vasculitis (AAV) is a small to medium vessel vasculitis associated with excess morbidity and mortality. This **review** explores how management of AAV has evolved over the past two decades with pivotal randomized controlled trials shaping the management of induction and maintenance of remission.

## Antineutrophil cytoplasmic antibody-associated ...

<https://ard.bmj.com/content/72/8/1273> ▾

Aug 01, 2013 · **Antineutrophil cytoplasmic antibody (ANCA)-associated vasculitides** are a heterogeneous group of diseases corresponding to necrotising inflammation of small vessels with a wide range of clinical presentations. At least two of the diseases are believed to exhibit a common ground of pathophysiological mechanisms. These are granulomatosis with ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6165750>

INTRODUCTION. **Antineutrophil cytoplasmic antibody (ANCA)-associated vasculitides** are a small vessel multi-system vasculitis characterized by necrotizing inflammation of the blood vessel wall and the presence of ANCAs []. Although classically a disease of the older population with peak incidence at age >40 years [], ANCA associated vasculitis (AAV) can also be associated with ...
