

Dear reviewer,

The following changes have been made in accordance with the annotations that were made:

- The following typos were corrected:

metastastic → metastatic

long term → long-term

For collection → for the collection

Data extraction (lack of full stop → data extraction.

which were → that were

a major hepatectomy → major hepatectomy

with a satisfactory oncological evidence → with satisfactory oncological evidence

- Article highlights were added
- Please specify the start date (month and year) of the search strategy for all articles.  
→ added beneath 'Search strategy'
- This review seems to confirm the absolute need for future prospective multicentre RCT comparative studies and probably this point should be highlighted in the discussion.  
→ added beneath 'Discussion'
- PMID and DOI numbers are missing in the reference list. Please provide the PubMed numbers and DOI citation numbers to the reference list and list all authors of the references. Please revise throughout  
→ All references have been revised as asked

Best regards.
