#### **SPECIFIC COMMENTS TO AUTHORS**

This manuscript was clinical guidelines which focused on the management of thymic epithelial tumors (TET). The authors reviewed the diagnosis and treatment of TET and provided the recommendation of therapeutic strategy. This study was conducted well. The data are presented clearly. In general, this is a well-written paper that presents informative data. This article will be of interest to clinicians and researchers involved in this field. However, the following minor issues should be addressed: Minor 1. The authors should describe a search strategy of the literature in detail. 2. The authors should emphasize to adopt the Masaoka-Koga stage classification system not the new TNM staging system in the guidelines before providing therapeutic recommendations. 3. Please add the explanation for abbreviations in each figure.

## RE-REVIEW REPORT OF REVISED MANUSCRIPT
