Helicobacter pylori infection, susceptibility to (Concept ...

<https://www.ncbi.nlm.nih.gov/medgen/325004>

Helicobacter pylori is a microaerophilic, gram-negative bacterium that colonizes the gastric mucosa of approximately 50% of the world's population, and is a primary pathogenic factor in benign and malignant gastroduodenal disease (Warren and Marshall, 1983; Blaser and Parsonnet, 1994). Tomb et al. (1997) reported the complete sequence of the circular genome of H. pylori.
