Jan 17, 2018 · 1 Introduction. Breast cancer is the most common type of cancer among women worldwide and ranks as the second most common cancer among women in Korea. Owing to the advances in systemic therapies, including intensive local treatment, chemotherapy, endocrine therapy, and targeted therapy, overall survival rates of breast cancer have increased; however, these ...

<https://pubmed.ncbi.nlm.nih.gov/32257726>

Urinary bladder metastasis from breast cancer is rarely reported in the literature. In this review, we examined the reported cases of breast cancer metastasizing to the urinary bladder, with the objective of identifying clues that could help physicians in diagnosing and planning further treatment. We performed a systematic review of the ...

[Breast cancer metastasis to the stomach](#)

<https://jcmtjournal.com/article/view/3037>

Gastrointestinal metastasis from breast cancer can be synchronous or more frequently metachronous, with a mean time of presentation reported to be from 6 to 7 years [5], but in literature time can vary from 2 to 30 years [5, 6]. In our study there were 54 cases with metachronous presentation and only 10 patients with synchronous disease.

Nov 01, 2018 - Bones are in fact the most frequent **metastatic site** among patients with **breast cancer** since up to 70% of all patients with disseminated **breast cancer** develop BM. In **breast**, prostate and lung cancer, the antiresorptive **treatment**, bisphosphonates and denosumab, reduces further progression in bones and prevents complications by reducing the upregulated osteoclast activity caused by the **metastasis**.

Breast Cancer Treatment: A Review<https://pubmed.ncbi.nlm.nih.gov/30667505>

Median overall survival for **metastatic triple-negative breast cancer** is approximately 1 year vs approximately 5 years for the other 2 subtypes. Conclusions and relevance: **Breast cancer** consists of 3 major tumor subtypes categorized according to estrogen or progesterone receptor expression and ERBB2 gene amplification. The 3 subtypes have distinct risk profiles and **treatment strategies**.

Intestinal metastasis from breast cancer: Presentation, treatment and survival from a systematic literature review

Bolzacchini E *et al.* Intestinal metastasis from breast cancer

Elena Bolzacchini, Olga Nigro, Davide Inversini, Monica Giordano, Giovanni Maconi

Abstract

BACKGROUND

Intestinal metastasis from breast cancer (BC) is rare; available data depend mainly on case reports and case series.

AIM

To conduct a review of the literature regarding presentation, diagnosis, treatment
