### Clinical characteristics and outcomes of COVID-19 patients ...

<https://onlinelibrary.wiley.com/doi/full/10.1111/jgh.15199>

Patients with COVID-19 could present with gastrointestinal symptoms without fever or respiratory manifestations, which could be overlooked by health care providers. We aimed to evaluate the clinical characteristics of 2019 novel coronavirus disease (COVID-19) in patients presenting with initial gastrointestinal symptoms.

### Digestive Symptoms in COVID-19 Patients With Mild Disease ...

<https://pubmed.ncbi.nlm.nih.gov/32301761>

In this study, we sought to describe the clinical characteristics of COVID-19 patients with digestive symptoms and mild disease severity. Methods: We identified COVID-19 patients with mild disease and one or more digestive symptoms (diarrhea, nausea, and vomiting), with or without respiratory symptoms, and compared them with a group presenting ...

### Gastrointestinal manifestations of COVID-19 | Cleveland ...

<https://www.ccjm.org/content/early/2020/06/16/ccjm.87a.ccc049> ▾

Gastrointestinal (GI) symptoms are seen in patients with COVID-19. The prevalence could be as high as 50%, but most studies show ranges from 16% to 33%. Presenting with GI symptoms increases the risk of testing positive for SARs-CoV-2. Approximately 50% of patients with COVID-19 have detectable virus in their stool. Having GI symptoms has been associated with more severe disease.

### Clinical characteristics and outcomes of patients ...

<https://www.sciencedirect.com/science/article/pii/S2589537020300754>

We described the epidemiological, clinical, and laboratory characteristics, treatment, and clinical outcomes of 34 patients who underwent surgery during the incubation period of COVID-19 infection. This report, to the best of our knowledge, is the first retrospective study to describe the effects of surgery on COVID-19 progression and its ...
