#### **SPECIFIC COMMENTS TO AUTHORS**

The review is novel and interesting and adds to the knowledge base. The topic of Gerotechnology is appropriate and of general interest. Relevance, significance and potential impact of the manuscript is good. The mini-review includes a balanced, comprehensive and critical view of the research area. Minor remarks: 1. As mentioned as this review, dementia is just only a spectrum of clinical symptoms, not the name of a group of diseases. The disorders that can cause dementia include Alzheimer's disease, vascular dementia, frontotemporal dementia, and Lewy body dementia, The neuropsychological assessment should be performed to determine which technology and social media for some patients with specific dementia, These factors did not addressed in the review. 2.The authors should help readers understand the content of the reviews using the Figure and Table. 3.what is meaning of the title "the eyes of technology"? please rephrase the title and make sense. 4.Please explain the current challenges in the Gerotechnology and possible negative impacts on dementia. please discuss about health economics of the gerotechnology.
