### OF SMC IRB REVIEW SUMMARY

Investigator : Jong Man Kim, M.D., Ph.D.  
Professor, Dept. of Transplantation Surgery, SMC

SMC IRB File No. : 2020-09-077

Protocol Title : Surgical treatment outcomes of primary hepatic sarcomas

☒ **Approval**

☐ Contingent approval

\* Please append details or summarize reason(s) for determination below:

This retrospective study is to investigate surgical treatment outcomes (recurrence rate, survival rate, etc.) of primary hepatic sarcomas. It is considered less than minimal risks to subjects and meets the requirement set forth in the category 5 of Expedited Review Request Form. The IRB determination for this research is "**Approval**".

Acquiring participant's consent (1) seems to be realistically impossible and does not influence integrity of research (2) there would be no reasons that participant would deny providing his or her consent, even though consent is waived, research involves no more than minimal risk to the participants. Therefore, participant's consent can be waived.

SMC IRB approved this research for one year interval.

To continue the research after the expiration of IRB approval, the PI must submit "Research Progress Report ([www.e-IRB.com](http://www.e-IRB.com) → Log-in → e-IRB Main Bar → Download Forms → Reference Room)" for the continuing review after Aug. 07, 2021.
