

ANSWERING REVIEWERS

Dear Editor and Reviewers,

Thank you for reviewing our paper "Off-the-shelf 3D printed titanium cups in primary total hip arthroplasty " .

We've appreciated your comments. We changed some of the content of the manuscript according to the revisions required by the reviewer (see comments below).

We hope that you will consider our revised manuscript for publication in *World Journal of Orthopedics*

Sincerely,

The authors of the paper WJO-62402

Reviewer #1

Dear Authors, you did accomplish a good paper on acetabular cups made out of porous metal. Unfortunately, you missed some early publication about cementless porous metal implants. Therefore, the discussion section urges revision in particular you should include and cite some established papers on porosity, pore size and fixation of acetabular components. The other parts of your manuscript do require minor revisions only. You will find my remarks in the revised manuscript where changes are tracked

We thank the Reviewer for his positive comments. We have made changes in accordance with the reviewers' comments.
