Omalizumab in Severe Refractory Vernal ...

<https://link.springer.com/article/10.1007/s40123-016-0074-2>

Dec 01, 2016 · It has initially been authorized for the treatment of severe asthma. Few case reports suggest its efficacy in VKC and atopic keratoconjunctivitis [15, 16]. The purpose of this study is to report our clinical experience with omalizumab in severe refractory cases of VKC in children, and to review the literature.

Jan 04, 2019 · Most cases of viral conjunctivitis are mild. The infection will usually clear up in 7 to 14 days without treatment and without any long-term consequences. However, in some cases, viral conjunctivitis can take 2 to 3 weeks or more to clear up. A doctor can prescribe antiviral medication to treat more serious forms of conjunctivitis.
