

To Whom it May Concern,

Rates of Readmission and Reoperation after Operative Management of Midshaft Clavicle Fractures in Adolescents

The following manuscript has been reviewed by a member of our research team with biostatistical expertise and appropriate statistical methodology and analysis were utilized.

Sincerely,

A handwritten signature in black ink that reads "Ishaan Swarup". The script is cursive and fluid, with the first name "Ishaan" and last name "Swarup" clearly legible.
