SPECIFIC COMMENTS TO AUTHORS

The paper is an interesting review about the association of Corona Virus-19 infection and clinical development of acute pancreatitis. The Authors carefully analyze several fields of the topic. The selection of the literature is well done and complete. Bibliographical references are recent and well selected. The importance of the paper and the significance of its contents are relevant because of the big interest and clinical impact of the CoViD-19 issue.

SPECIFIC COMMENTS TO AUTHORS

This is a review summarizing the association between COVID-19 infection and acute pancreatitis. This paper listed case reports. It is necessary to indicate the age characteristics, the period from the onset of COVID-19 infection to acute pancreatitis, the severity of pancreatitis, the treatment method and the prognosis in a table.

SPECIFIC COMMENTS TO AUTHORS

The authors review the association of acute pancreatitis (AP) and COVID-19. The authors suggest that AP may be a consequence of direct pancreatic damage by the virus, because pancreatic acinar cells contain ACE2 receptor proteins. They argue that SARS-CoV-2 can bind to these receptors causing pancreatic injury. The review is comprehensive of case reports and case series affecting patients with AP and COVID-19. The English is not satisfactory, because the construction of some sentences is awkward and some grammar mistakes are still present. The manuscript should go through a professional English editing.

SPECIFIC COMMENTS TO AUTHORS

Basically, the topic about the relationship between COVID-19 and AP is interesting and has practical significance. But the literature study is too primary. It is better to conduct active analysis in details based on the data from individual case reports and cohort studies. Otherwise it is difficult to get a clear conclusion. In addition, the future works and the limitation of this studies were not mentioned.
