

## Answering reviewers

- 1) The title of the manuscript was revised to “Assessing optimal Roux-en-Y reconstruction techniques after total gastrectomy using the PGSAS-45 scale”.
- 2) “As postgastrectomy syndrome is the severest following total gastrectomy, reducing the onset of syndrome should be deliberated while choosing the surgical technique.” in the introduction part, 2nd sentence was revised to “As postgastrectomy syndrome is the severest form of the side effect following total gastrectomy, reducing the incidence of syndrome should be deliberated while choosing the surgical technique.”
- 3) All mistakes in the reference part were corrected.
