This is probably the most obvious advantage that technological gadgets have on a company's HR. Technology makes it easier to communicate due to different mediums introduced. You can easily communicate in a matter of seconds through emails, text and other messaging applications. Many

Special Issue "Sensors for Posture and Human Motion ..."

<https://www.mdpi.com/journal/sensors/special...>

Dec 31, 2020 - It is a challenge to meaningfully combine new sensor technology and the algorithmic advances in AI and ML. This Special Issue will cover a wide range of topics around human posture and motion, including new sensor technologies to capture posture and motion; new algorithmic approaches to derive, analyze, and recognize posture and motion from sensor data; and all combinations of these ...

Digital Exercise Performance Tracking with Kaia Health's ...

<https://www.kaiahealth.com/blog/motion-coach-exercise-tracking>

Powered by artificial intelligence (AI), Motion Coach's computer vision technology enables smartphone and tablet cameras to "see" more like humans do, analyzing the user's movement patterns during exercises for real-time analysis and providing live, corrective feedback.

Technological advancements in the analysis of human motion and posture management through digital devices

Roggio F *et al.* Technological advancements in the analysis of human motion

Federico Roggio, Silvia Ravalli, Grazia Maueri, Antonino Bianco, Antonio Palma, Michelino Di Rosa, Giuseppe Musumeci

Abstract

Technological development of motion and posture analyses is rapidly progressing, especially in rehabilitation settings and sport biomechanics. Consequently, clear
