#### **SPECIFIC COMMENTS TO AUTHORS**

Manuscript NO: 64350 Title: LONG-TERM ALBUMIN INFUSION IN DECOMPENSATED CIRRHOSIS: A REVIEW OF CURRENT LITERATURE Manuscript Type: Review Correspondence to: Wong Yu Jun, MD, MRCP, FAMS This is a comprehensive review. Authors had better discuss the limitation of human albumin supply. If positive results in long-term albumin, amount of albumin will be necessary for decompensated cirrhotic patients. The supply by blood donation might be limited. How about the cell-free concentrated ascites reinfusion therapy (CART) in cirrhotic patients? Minor; What meant 'IV albumin'? Was 'IV albumin' different from 'albumin'?
