## [Occurrence of dietary risk factors in inflammatory bowel ...](#)

<https://www.ncbi.nlm.nih.gov/pubmed/30085433>

Only low fiber intake was associated with a worse **nutritional status of patients** with UC. No consistent **influence** of the number of **IBD** dietary risk factors on the **nutritional status of patients** was found.

CONCLUSIONS: The **nutritional status of IBD patients** in remission was related to the type of dietary risk factors, but did not depend on the number of them. PMID: 30085433 [Indexed for MEDLINE] ...

## Inflammatory Bowel Disease

Medical Condition

A group of intestinal disorders that cause inflammation of the digestive tract. This causes abdominal pain, cramping and unexplained weight loss.

Common (More than 200,000 cases per year in US)

Often requires lab test or imaging

Treatments can help manage condition, no known cure

Can be lifelong

IBD is said to be the result of autoimmune reactions. Inflammatory bowel disease (IBD) presents as crohn's disease or ulcerative colitis. It may be characterized by diarrhea, abdominal pain and cramping, tiredness, and weight loss. Treatment of inflammatory bowel disease focuses on reducing inflammation that causes the symptoms which can eventually lead to complications. The treatment involves administering medication or performing surgery.

## Symptoms

Symptoms may vary from mild to severe and include:

- Diarrhea
- Fever
- Fatigue
- Blood in stool
