

**Signed Informed Consent Form(s) or Document(s) Statement.**

**Title:** Addition of castor oil as a booster in colon capsule regimens significantly improves completion rates and polyp detection.

**Statement:** This form is not applicable as this study has been registered as a service evaluation project by the process improvement department which is part of the quality safety and risk management directorate in our hospital.

Our local quality safety and risk management directorate defines *Service Evaluation* as: An internal evaluation of a service provided to a select set of patients for a given period of time in order to identify issues/good practice and implement appropriate changes if necessary.

**Does not require consent or ethical approval.**
