SPECIFIC COMMENTS TO AUTHORS

The authors drafted a good manuscript describing the inter-regulatory role of miRNAs in interaction between viruses and stem cells. Overall the manuscript is well written, descriptive and comprehensive. In spite of the authors provided a language editing certificate, there are many typos and grammatical errors that should be corrected. In addition they should shorten the manuscript and focusing only in the inter-regulatory role of miRNAs in in virally infected stem cells to be specific with the Journal scope.

SPECIFIC COMMENTS TO AUTHORS

This review is very interesting. The authors clearly summarized the role of miRNA in the interaction between viruses and stem cells. Therefore, I recommend that the article should be accepted as it is.
